

iP SERIES

DESIGNED FOR INSTALL

QUICK PITCH

Mackie iP Series Install Performance Loudspeakers are designed exclusively for a wide range of installed sound reinforcement applications, with the features contractors need and performance customers expect. With ample rigging points for vertical or horizontal rigging and custom high-performance drivers, iP delivers rich, articulate full-bandwidth response in a sleek, compact design.

Lineup

iP Series Passive Loudspeakers feature 10", 12" and 15" two-way designs for a wide range of high-output install-ready solutions. Add the iP-18S installation subwoofer to deliver the solid low-frequency extension and output required for full-range music playback in live music venues.

Professional Performance...

Behind each iP loudspeaker's clean, professional look is a premium 1.4 titanium diaphragm compression driver and high-output, custom-designed ceramic woofer featuring a large voice coil to handle more power for maximum output in any install situation. Plus, all iP loudspeakers feature limiting and thermal protection circuitry.

Rugged Design

Each professional-grade cabinet features an extremely tough, all-wood design that brings natural character to your sound and ensures survival. Add to that a rugged steel front grille and protective scratch resistant black finish and you have speakers that not only deliver the sound you crave, but are also "Built-Like-A-Tank."

Install Solution

With their upscale appearance, solid, install ready cabinetry and amazing sound, iP series is perfectly suited for a wide range of professional install venues including bars, clubs, restaurants, theatres, small-medium houses of worship, auditoriums, conference and convention Halls, casinos, theme parks, and sports arenas to name a few.

Optimize Your Sound

Add the optional SP260 2x6 speaker processor to any iP installation for quick setup and flawless sonic performance. It offers sophisticated EQ, crossover, limiting & delay solutions, and system protection, all in a complete system optimized for the iP series of passive loudspeakers.

VISUAL OVERVIEW

RIGGING CONFIGURATIONS & ACCESSORIES

All models feature 8 M10 rigging points and a rotatable 90 x 50 horn for the ultimate flexibility in both vertical and horizontal hangs. Optional iP-CM100 ceiling and iP-WM100 wall mount accessories also meet the needs of the most aesthetically demanding venues. Plus each model includes dual Neutrik® parallel connectors and convenient terminal strip connectivity saving time and installation cost.
